PRIMULINUS HYBRIDS

In these Gladioli, which are crosses between the large flowered varieties and the South African wild species "Primulinus," we have new forms of dainty type, particularly adopted to table decorations, small baskets and vases, general decorative work and Florist's designs. The range of color is wide, running from red through orange, yellow, saffron, pink, cream, and wonderful color combinations not seen in the large flowered sorts. Some varieties are small, others run as large as many in the large type. By all means grow some Primulinus Hybrids.
